QCC Co., Limited

## EU Declaration of Conformity Annex IX PPE Regulation (EU) 2016/425

This EU Declaration of conformity refers to the following products:

1. Product info

Name: Particle filtering half mask

Model: KADI-001 Classification: FFP2

Serial No .: ---

The Manufacturer's name and address is as follows:

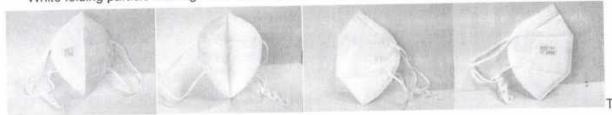

Name: Hefei Kadi Biological Pharmaceutical Co., Ltd.

Address: 2<sup>nd</sup> Floor, No.3 Building, Workshop 3, Xiwei San Rd., Feidong Economic Development Zone, 231600, Hefei, Anhui, China

- This Declaration of Conformity is issued under the sole responsibility of the Manufacturer.
- 4. Detailed description of the PPE to allow traceability/identification of the PPE.

KADI-001

White folding particle filtering half mask without valve, internal metal nose clip

he article identified in (4) above is in conformance with the relevant Union Harmonization Legislation Regulation (EU) 2016/425.

References to the relevant harmonized standards used, including the date of the standard, or references to the other technical specifications, including the date of the specification, in relation to which conformity is declared:

EN 149:2001+A1:2009

CCQS Certification Services Limited. (NB 2834) performed the EU Type Examination (Module B) and issued the Type Examination Certificate Number: Module B

No.	EU Type Examination (Module B) Certificate Number
1	We will fill this sheet when the certificate is issued

Product Category:

 This product is Category III and is subject to Module C2 internal production control plus supervised product checks at random intervals and is under the surveillance of CCQS Certification Services Limited. (NB 2834)

□ This product is Category III and is subject to Module D Conformity to type based on quality assurance of the production process and is under the surveillance of CCQS Certification Services Limited. (NB

2834)

Date: 07.04.2020

CCQS Project Reference: CE-PC-200401-179

## Confirmation Letter

To whom it may concern:

This is to confirm that Hefei Kadi Biological Pharmaceutical Co., Ltd., Address: 2<sup>nd</sup> Floor, No. 3 Building, Workshop 3, Xiwei San Rd., Feidong Economic Development Zone, 231600, Hefei, Anhui, China has entered into the service agreement CE-PC-200401-179 with CCQS Certification Services Limited, with regards to the application of Module B EU Type Examination Certification and Module D Production Monitoring for Particle filtering half mask, Model: KADI-001, KADI-002, KADI-003 within the scope of Personal Protective Equipment Regulation (EU) 2016/425 Category III.

Please note this document does not provide the function of a EU Type Examination Certificate. This document merely confirms that the project referenced above is currently under our assessment.

If in any doubt about the integrity of this letter, please contact CCQS by email to verify.

Product: Particle filtering half mask

Detailed product description listed in the Annex

Model(s): KADI-001

Standard(s): EN 149:2001+A1:2009

Respiratory protective devices - Filtering half masks to protect against

particles - Requirements, testing, marking

Issue date: 2020-06-12

Revision date: 2020-09-11

Expiry date: 2021-06-11

The product(s) on this certificate and the Technical File have been assessed and found to be in conformance with the applicable Essential Health and Safety Requirements in Annex II of the PPE regulation 2016/425.

Any changes to the design, manufacturing location or manufacture of the PPE product certified here must be advised to CCQS Certification Services Limited for review.

CE marking shall not be applied until the requirements of all the PPE Regulation 2016/425 and relevant EN Harmonised standards and/or Technical specifications have been met.

If the certified product is Category III then this certificate is only valid if used in conjunction with Conformity Assessment against Module C2 or Module D.

This certificate remains the property of CCQS and maybe withdrawn at any time if it is considered that the equipment is no longer in conformity with the requirements of the PPE Regulation 2016/425.

Approved by Ireland Government as a Notified Body for CE Marking No.2834

CCQS Certification Services Limited in its role as a Notified Body for PPE Regulation, is monitoring that the manufacturer is producing PPE in conformity with the type described in the EU type-examination certificate and associated technical file and which satisfies the Essential Health and Safety Requirements of the Regulation. The equipment covered by this certificate is listed in the accompanying schedule. This certificate is not complete and has no validity without the accompanying schedule and revision index.

The manufacturer is hereby authorized to affix our Notified Body number, 2834, to each item of PPE mentioned in the schedule which accompanies this certificate whilst this certificate remains valid.

This certificate and the accompanying schedule remain the property of CCQS and maybe withdrawn or revised at any time if CCQS considers that the equipment is no longer in conformity with the requirements of the Regulation.

Approved by Ireland Government as a Notified Body for CE Marking No.2834

## Conditions:

The test results presented in this report relate to the samples tested only.

This report may be reproduced and distributed to your clients, provided that it is reproduced and distributed in full.

The authenticity of this test report and its contents can be verified by contacting the laboratory.

**Test Results** 

7.3 Visual inspection Not tested 1

The visual inspection shall include the marking and information supplied by the manufacturer.

Note1: As requested by the client, marking and information supplied by the manufacturer was not inspected.

7.4 Package Pass<sup>2</sup>

Particle filtering half masks shall be offered for sale packaged in such a way that they are protected against mechanical damage and contamination before use.

Note2: In accordance with the requirement.

7.5 Material Pass<sup>3</sup>

Materials used shall be suitable to withstand handling and wear over the period for which the particle filtering half mask is designed to be used.

Any material from the filter media released by the air flow through the filter shall not constitute a hazard or nuisance for the wearer.

After undergoing the conditioning described in 8.3.1 none of the particle filtering half masks shall have suffered mechanical failure of the facepiece or straps.

When conditioned in accordance with 8.3.1 and 8.3.2 the particle filtering half mask shall not collapse.

Note3: No mechanical failure after undergoing the conditioning described in 8.3.1. No collapse when conditioned in accordance with 8.3.1 and 8.3.2.

#### 7.6 Cleaning and disinfecting

N/A4

If the particle filtering half mask is designed to be re-usable, the materials used shall withstand the cleaning and disinfecting agents and procedures to be specified by the manufacturer.

Note4: Single shift use only.

#### 7.7 Practical performance

Pass5

The particle filtering half mask shall undergo practical performance tests under realistic conditions.

Note5: No imperfections.

#### 7.8 Finish of parts

Pass<sup>6</sup>

Parts of the device likely to come into contact with the wearer shall have no sharp edges or burrs.

Note6: No sharp edges or burrs.

#### 7.9.1 Total inward leakage

Pass7

For particle filtering half masks fitted in accordance with the manufacturer's information, at least 46 out of the 50 individual exercise results (i.e. 10 subjects x 5 exercises) for total inward leakage shall be not greater than: 25% for FFP1, 11% for FFP2, 5% for FFP3

and, in addition, at least 8 out of the 10 individual wearer arithmetic means for the total inward leakage shall be not greater than

22% for FFP1, 8% for FFP2, 2% for FFP3

Note7: FFP2 respirator. Test results are shown in Annex A Table 7.9.1-A&B.

#### 7.9.2 Penetration of filter material

Pass8

The penetration of the filter of the particle filtering half mask shall meet the requirements of Table 1.

Sodium chloride test 95 l/min

Paraffin oil test 95 l/min

FFP1 ≤20% ≤20%

Report No: 2020 (D) - 0778 Page 4 of 10

FFP2 ≤6% ≤6% FFP3 ≤1% ≤1%

Note8: FFP2 respirator. Test results are shown in Annex A Table 7.9.2.

#### 7.10 Compatibility with skin

Pass9

Materials that may come into contact with the wearer's skin shall not be known to be likely to cause irritation or any other adverse effect to health.

Note9: No irritation or any other adverse effect to health.

7.11 Flammability Pass<sup>10</sup>

When tested, the particle filtering half mask shall not burn or not to continue to burn for more than 5 s after removal from the flame.

Note10: Test results are shown in Annex A Table 7.11.

#### 7.12 Carbon dioxide content of the inhalation air

Pass11

The carbon dioxide content of the inhalation air (dead space) shall not exceed an average of 1,0 % (by volume) Note11: Test results are shown in Annex A Table 7.12.

7.13 Head harness Pass<sup>12</sup>

The head harness shall be designed so that the particle filtering half mask can be donned and removed easily. The head harness shall be adjustable or self-adjusting and shall be sufficiently robust to hold the particle filtering half mask firmly in position and be capable of maintaining total inward leakage requirements for the device.

Note12: Head harness can be donned and removed easily, adjustable or self-adjusting and have sufficiently robust to hold the particle filtering half mask firmly.

7.14 Field of vision Pass<sup>13</sup>

The field of vision is acceptable if determined so in practical performance tests.

Note13: Pass the practical performance tests.

7.15 Exhalation valve N/A<sup>14</sup>

A particle filtering half mask may have one or more exhalation valve(s), which shall function correctly in all orientations.

If an exhalation valve is provided it shall be protected against or be resistant to dirt and mechanical damage and may be shrouded or may include any other device that may be necessary for the particle filtering half mask to comply with 7.9.

Exhalation valve(s), if fitted, shall continue to operate correctly after a continuous exhalation flow of 300 l/min over a period of 30 s.

When the exhalation valve housing is attached to the faceblank, it shall withstand axially a tensile force of 10 N applied for 10 s.

Note14: No exhalation valve.

#### 7.16 Breathing resistance

Pass<sup>15</sup>

Classification	Ma	aximum permitted resistance (mba	ur)
	Inhalati	on	Exhalation
T-	30 I/min	95 l/min	160 l/min
FFP1	0.6	2.1	3.0
FFP2	0.7	2.4	3.0
FFP3	1.0	3.0	3.0

Note15: FFP2 respirator. Test results are shown in Annex A Table 7.16.

Report No: 2020 (D) - 0778 Page 5 of 10

7.17 Clogging N/A<sup>16</sup>

#### 7.17.2 Breathing resistance

Valved particle filtering half masks:

After clogging the inhalation resistances shall not exceed:

FFP1: 4 mbar, FFP2: 5 mbar, FFP3: 7 mbar at 95L/min continuous flow

The exhalation resistance shall not exceed 3 mbar at 160 L/min continuous flow

Valveless particle filtering half masks

After clogging the inhalation and exhalation resistances shall not exceed:

FFP1: 3 mbar, FFP2: 4 mbar, FFP3: 5 mbar at 95L/min continuous flow

#### 7.17.3 Penetration of filter material

Soc	dium chloride test 95 l/min	Paraffin oil test 95 l/min
FFP1	≤20%	≤20%
FFP2	≤6%	≤6%
FFP3	≤1%	≤1%
Note16: Single	shift use only.	

#### 7.18 Demountable parts

Pass<sup>17</sup>

All demountable parts (if fitted) shall be readily connected and secured, where possible by hand Note17: In accordance with the requirement.

9 Marking Not tested

#### 9.1 Packaging

The following information shall be clearly and durably marked on the smallest commercially available packaging or legible through it if the packaging is transparent.

- 9.1.1 The name, trademark or other means of identification of the manufacturer or supplier.
- 9.1.2 Type-identifying marking.
- 9.1.3 Classification

The appropriate class (FFP1, FFP2 or FFP3) followed by a single space and then: "NR" if the particle filtering half mask is limited to single shift use only. Example: FFP3 NR, or "R" if the particle filtering half mask is re-usable. Example: FFP2 R D.

- 9.1.4 The number and year of publication of this European Standard.
- 9.1.5 At least the year of end of shelf life. The end of shelf life may be informed by a pictogram as shown in Figure 12a, where yyyy/mm indicates the year and month.
- 9.1.6 The sentence 'see information supplied by the manufacturer', at least in the official language(s) of the country of destination, or by using the pictogram as shown in Figure 12b.
- 9.1.7 The manufacturer's recommended conditions of storage (at least the temperature and humidity) or equivalent pictogram, as shown in Figures 12c and 12d.
- 9.1.8 The packaging of those particle filtering half masks passing the dolomite clogging test shall be additionally marked with the letter "D". This letter shall follow the classification marking preceded by a single space.

#### 9.2 Particle filtering half mask

Particle filtering half masks complying with this European Standard shall be clearly and durably marked with the following:

9.2.1 The name, trademark or other means of identification of the manufacturer or supplier.

Report No: 2020 (D) - 0778 Page 6 of 10

- 9.2.2 Type-identifying marking.
- 9.2.3 The number and year of publication of this European Standard.
- 9.2.4 Classification

The appropriate class (FFP1, FFP2 or FFP3) followed by a single space and then: "NR" if the particle filtering half mask is limited to single shift use only. Example: FFP3 NR, or "R" if the particle filtering half mask is re-usable. Example: FFP2 R D.

- 9.2.5 If appropriate the letter D (dolomite) in accordance with clogging performance. This letter shall follow the classification marking preceded by a single space
- 9.2.6 Sub-assemblies and components with considerable bearing on safety shall be marked so that they can be identified.

Filtering half masks to protect against particles

Requirements, testing, marking

Report Reference No.....: XKS202003160104PPE

Tested by (name + signature).....: Huigang.Cai

Approved by (name + signature) .: Shuimei.Cao

Date of issue.....: 2020-03-26

Total number of pages.....: 25

Testing Laboratory.....: Shenzhen Xunke Standards Technical Services Co., LTD

Address.....: 2nd Floor, Building E2, Qiangrong East Industrial Zone, Jiuwei

Community, Xixiang Street, Baoan District, Shenzhen City,

XKS)

Guangdong Province, China.

Applicant's name...... Hefei Kadi bio Pharmaceutical Co., Ltd.

Building 003,3# North of Xiweisan Road, West Outer

Address...... Ring, Economic Development Zone, Feidong County, Hefei, China.

Test specification:

Standard.....: EN 149:2001+A1:2009

Test procedure ...... CE-PPE

Non-standard test method.....: N/A

Test Report Form No.....: EN 149-104PPE

Master TRF.....: Dated 2020-03

Trade Mark .....: None

Manufacturer ...... Hefei Kadi bio Pharmaceutical Co.,Ltd.

Building 003,3# North of Xiweisan Road, West Outer

Ring, Economic Development Zone, Feidong County, Hefei, China.

Test item description ...... KN95 Mask
